

Splitting our I's and Straightening our Tees

Before and After: Curved Steel Tees Transformed

The process of splitting beams into Tees can often result in a “banana’d” shape. While our specialty is curving steel, we’re also experts at splitting and straightening beams. We can turn those problematic Tees into straight, usable pieces with precision and care.

Straightening Capabilities – Better than mill tolerance

Beam: up to W44 x 335

Tee Stems: up to 22”

Splitting Capabilities

Beam: web thickness up to 3.5”

Beam: W&S

Beam: up to W40 x 431

Beam Split Length: up to 75ft+

Beam: Offset split and straighten capabilities
